SECTION 2 – HAZARD IDENTIFICATION

Hazard Classification: Product is not classified as hazardous.

Health Hazards: Excessive inhalation of product as a mist may result in respiratory irritation.

Label Elements:

Hazard Symbol: None required.
Signal Word: None required.
Hazard Statement: Excessive inhalation of product as a mist may result in respiratory irritation.

Precautionary Statement:

Prevention: IF INHALED: Avoid breathing mist/vapors/spray. Use only outdoors or in a well-ventilated area.
Response: IF RESPIRATORY IRRITATION OCCURS: Remove to fresh air. Seek medical attention if irritation persists.

Other hazards which do not result in GHS classification:

Although product has a flashpoint of 600°F to 625°F, spontaneous combustion may result from combustible materials soaked in product.

SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS

The criteria for listing components in the composition are as follows: Carcinogens are listed when present at 0.1% or greater; components which are otherwise hazardous according to OSHA are listed when present at 1.0% or greater, by weight or volume. Non-hazardous components may be listed at

Safety Data Sheet HydroGold™

3.0% or greater if not proprietary in nature. This is not intended to be complete compositional disclosure. Refer to section 14 for applicable States' Right-to-Know and other regulatory information.

Chemical name	CAS number	Percent by Weight	PEL
Vegetable Oil	8001-22-7	99-100	TWA 15 mg/m ³ (mist, total) TWA 5 mg/m ³ (mist, respirable)

SECTION 4 - FIRST AID MEASURES

Ingestion: Not anticipated to be an ingestion hazard, although excessive ingestion may cause gastrointestinal disturbance. Seek medical attention if symptoms occur.

Inhalation: Not anticipated to be an inhalation hazard under normal use. Excessive inhalation of mists may cause irritation - remove exposed person to fresh air if adverse effects are observed.

Skin Contact: Not anticipated to be a skin irritant under normal use. If skin irritation or rash occurs, seek medical attention.

Eye contact: Not anticipated to be an eye irritant under normal use. If irritation occurs, flush thoroughly with water for a minimum of 15 minutes.

SECTION 5 - FIRE-FIGHTING MEASURES

General Fire Hazards: Material may present a fire hazard when dispersed or spread by water.

Flashpoint 600°F – 625°F

Extinguishing media Use Dry Chemical Powder, Carbon Dioxide, Foam, Sand, or Fog

Decomposition Products Fire may generate smoke consisting of acrolein, carbon monoxide, and carbon dioxide.

Lower Flame Limit: ND

Upper Flame Limit: ND

Unusual Fire & Explosion Hazards: There is a risk of ignition from saturated rags or other saturated combustible materials; these materials should be kept in metal cans with tight-fitting lids (preferably steel oily waste safety cans).

Fire Fighting Equipment: As in any fire, Fire Fighters and others exposed to products of combustion should wear self-contained breathing apparatus.

Safety Data Sheet HydroGold™

SECTION 6 - ACCIDENTAL RELEASE MEASURES

CHEMICAL EMERGENCY NUMBER (24 HOURS): CHEMTREC
USA/Canada Call 1-800 424-9300 CHEMTREC
Outside USA/Canada Call 1-703-527-3887

Spill: Stop the flow of material, if this is without risk. Dike area around spill for recovery and disposal. Vacuum free liquid for recycle and/or disposal. Residual liquid can be absorbed on inert material. Prevent entry into waterways, sewer, basements or confined areas. Avoid high pressure spraying when cleaning, or other method which might generate respirable aerosols.

RCRA Status: As sold, product is not a Characteristic or Listed RCRA hazardous waste.

SECTION 7 - HANDLING & STORAGE

Handle in accordance with good industrial hygiene and safety practices. These practices include avoiding unnecessary exposure and prompt removal of material from eyes, skin and clothing. Good housekeeping is essential in reducing possible slipping hazard.

Store away from open flames, hot surfaces, or other potential ignition sources. Provide sufficient general ventilation during and after application. Avoid prolonged or repeated contact with skin, eyes and clothing. After handling this product, wash hands before eating, drinking or smoking. If necessary, take first aid action shown in Section 4.

SECTION 8 – EXPOSURE CONTROL/PERSONAL PROTECTION

General Considerations:

Consider the potential hazards of this material (see section 3), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting protective equipment.

Eye Protection: Use goggles or safety glasses with faceshield if splashing is possible.

Respiratory Protection: Not normally needed. Use NIOSH-approved respirator if exposure is unknown or exceeds any permissible limits.

Protective Gloves: Wear impervious gloves.

Ventilation: General or Local exhaust.

Local Exhaust: Recommended in enclosed places or where material is aerosolized.

Protective Equipment: Hmis Personal Protection: B: Safety Glasses, Oil-resistant gloves, and NIOSH/MSHA-approved respirator, if usage produces aerosols.

Safety Data Sheet HydroGold™

Appropriate personal protective equipment should be selected based on the activity and possible exposure. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or only under certain circumstances.
