SECTION 2 – HAZARD IDENTIFICATION

CLASSIFICATION: Not classified as a hazardous substance according to the Globally Harmonized System of Classification & Labelling.

SECTION 3 – COMPOSITION/INFORMATION ON INGREDIENTS

COMPOSITION	CAS	PEL
Fatty acids, C16-18, esters with ethylene glycol	91031-31-1	NE

There is a general occupational exposure limit (OEL) for oil mists at the workplace of 5 mg/m³ based on the recommendation of the American Congress of Governmental Hygienists (ACGIH).

The criteria for listing components in the composition are as follows: Carcinogens are listed when present at 0.1% or greater; components which are otherwise hazardous according to OSHA are listed when present at 1.0% or greater. Non-hazardous components may be listed at 3.0% or greater if not proprietary in nature. This is not intended to be complete compositional disclosure. Refer to Section 14 for applicable states right-to-know and other regulatory information.

SECTION 4 – FIRST AID MEASURES

EYE CONTACT - In case of eye contact, flush immediately with water for a minimum of 15-20 minutes; occasionally lifting the upper and lower eyelids. Check for and remove contact lenses. Seek medical attention if irritation persists.

SKIN CONTACT –Wash contaminated skin thoroughly with soap and water, and remove contaminated clothing and shoes. Get medical attention if symptoms occur. Clean clothing and shoes thoroughly before reuse.

Safety Data Sheet ENVIROLUBE®

INHALATION - If respiratory irritation develops or if breathing becomes difficult, remove to fresh air. Get medical attention for adverse respiratory health effects.

INGESTION - If swallowed, do NOT induce vomiting. Wash mouth out with water, and seek immediate medical attention.

SECTION 5 – FIRE FIGHTING MEASURES

FLASHPOINT: >250°F

EXTINGUISHING MEDIA: Use dry chemical, carbon dioxide, or water spray. When mixed with water will create a probable slip hazard.

DECOMPOSITION PRODUCTS: NE

LOWER FLAME LIMIT: ND

HIGHER FLAME LIMIT: ND

UNUSUAL FIRE AND EXPLOSION HAZARDS: Cool containers with water spray. Keep unnecessary people away.

FIRE FIGHTING EQUIPMENT: Fire Fighters and others exposed to products of combustion should wear self-contained breathing apparatus.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

CHEMICAL EMERGENCY NUMBER (24 HOURS): CHEMTREC
1-800-424-9300 USA/CANADA

SPILL: In case of spill, keep unnecessary personnel away from area of spill. Cleanup personnel should wear suitable personal protective equipment and take precautions against slipping on product. If product cannot be collected by liquids vacuum and recycled, absorb with inert non-combustible absorbent material (e.g., sand, earth, diatomaceous earth, vermiculite) and dispose of in accordance with applicable regulations. Product as sold is a nonhazardous industrial waste. Avoid spillage into all drains, soil surfaces, and ground water. Spills causing environmental pollution must be reported to the relevant authorities. Discharges or spills into or leading to surface waters which cause a sheen must be reported to the National Response Center, (800) 424-8802.

RCRA STATUS: As sold, product is not a Characteristic or Listed RCRA hazardous waste.

SECTION 7 – HANDLING AND STORAGE

Handle in accordance with good industrial hygiene and safety practices. These practices include adequate ventilation, avoiding unnecessary exposure, using appropriate personal protective equipment when necessary, and prompt removal of material from eyes, skin and clothing. Good housekeeping is essential in reducing slipping hazards; avoid walking through spilled material. Do not reuse container.

Store in tightly closed original containers protected from sunlight in dry, cool, and well-ventilated area. Provide general ventilation as needed during and after application. Avoid prolonged or repeated contact with skin, eyes and clothing. After handling this product, wash hands before eating, drinking or smoking. If necessary, take first aid action shown in Section 4.

SECTION 8 – EXPOSURE CONTROL/PERSONAL PROTECTION

GENERAL CONSIDERATIONS:

Consider the potential hazards of this material (see section 3), job activities, and other substances in the work place when designing engineering controls and selecting protective equipment. There is an occupational exposure limit (OEL) for oil mists at the workplace of 5 mg/m³ based on the recommendation of the American Congress of Governmental Hygienists (ACGIH) that should be followed.

EYE PROTECTION: Chemical goggles are recommended. Goggles, or at a minimum face shields in combination with safety glasses should be worn during transfer operations or when there is a likelihood of misting, splashing or spraying of this material.

RESPIRATORY PROTECTION: Not normally needed. Use NIOSH-approved respirator for organic vapors if exposure is unknown or causes discomfort.

PROTECTIVE GLOVES: Wear protective gloves (suggested are PVC, neoprene, nitrile rubber) if irritating to skin. Check gloves frequently during prolonged use for breakthrough.

VENTILATION: General or Local exhaust.

LOCAL EXHAUST: Recommended in circumstances where general ventilation is limited, or where respiratory irritation occurs.

Use NIOSH/MSHA approved respiratory protection equipment when airborne exposure limits are exceeded (see below). Consult the respirator manufacturer to determine appropriate type of equipment for a given application. Observe respirator use limitations specified by NIOSH/MSHA or the manufacturer. Respiratory protection programs must comply with 29 CFR 1910.134.

VENTILATION NOTES: Provide general or local ventilation to control exposure levels. The use of local mechanical exhaust ventilation is preferred at sources of air contamination such as open process equipment. Consult NFPA Standard 91 for design of exhaust systems.

THRESHOLD LIMIT VALUE: None established for this Product.

PROTECTIVE EQUIPMENT: Splash goggles, gloves, apron

The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.
